

RALLY POINT TACTICAL PRESENTS:

# EUREKA EXPEDITIONARY SYSTEMS

Faster set up and tear down.  
Stronger structure.

## EUREKA - RAPID DEPLOYMENT SYSTEM

Meets and exceeds all MIL-STD (Military Standard) for expeditionary shelters

 **RDS-250**

Superior replacement for the Base-X 203

 **RDS-480**

Superior replacement for the Base-X 305

 **SL-3**

Smaller. Lighter. Stronger.  
Lights. Liners. Floors.  
Customize your shelter!

# THE PROBLEM

**SLOW. HEAVY. PARTS THAT BREAK.**

Most "fast" set up or rapidly deployable structures rely on a "scissor system" design to achieve the structural base of the shelter. Feedback from the field recognizes the negative factors associated with these types of shelters – including reduced efficiency, performance, ease of use, technical support and pack size.

- 8-10 Person Set Up
- 60 Minute Set Up
- Poles prone to breaking and failing
- Requires guy wires that physically increase your "footprint"

# THE SOLUTION

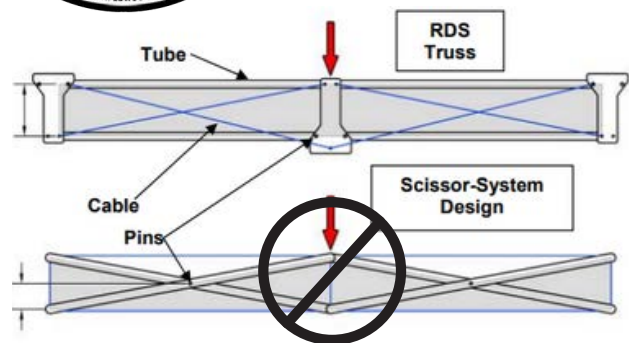

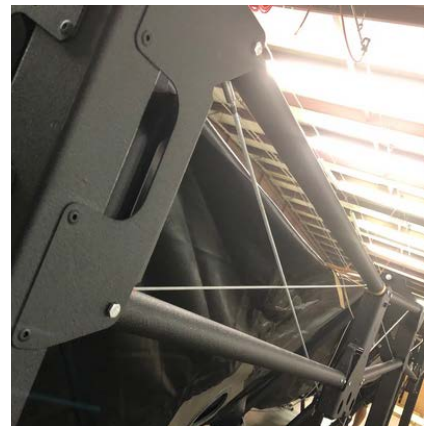

**FAST SET UP. INTELLIGENT PACKAGING. DURABLE FRAME.**

The RDS frame system consists of a **truss-style frame** for rugged and durable installation – and the synchronized gear system make it fast and easy. This patented design has been tested and passed at Aberdeen Proving Ground, one of the most diverse and rigorous test sites utilized by the Department of Defense.

When the RDS is deployed, it forms a structural truss. Each section has a four-sided structure of compressive members with two diagonal tension cables. Upon deployment, the cables are tensioned, becoming the major load bearing element.

*Other* quick erect tents do not use the structural trusses. *Tubes* in scissor systems design have pins in each end and at the mid-span – and become the major load bearing element. In addition, the hole at the mid-span is located at the point where the tube has the greatest bending stress during deployment and the *greatest opportunity for damage*.

- 3-4 Person Setup
- 7-8 Minute Set Up
- No "load bearing" poles to break
- No guy wires required to "tie down" tent.

# RDS-250

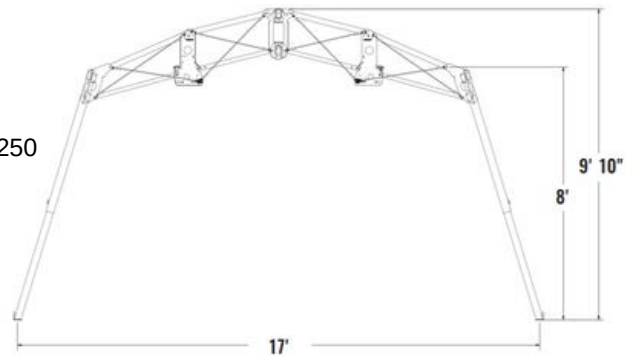

Superior replacement for the Base-X 203

7 Minute Setup!

- Under canopy with only 3 people in under 7 minutes
- Fully integrated floor and liner comes standard with each RDS-250
- Comes standard with TEMPER vestibule adapter
- No special kits for snow, wind or rain load
- Perfect for highly expeditionary uses and as auxiliary tents
- Easily boots to all fielded tents models and most vehicles

# RDS-480

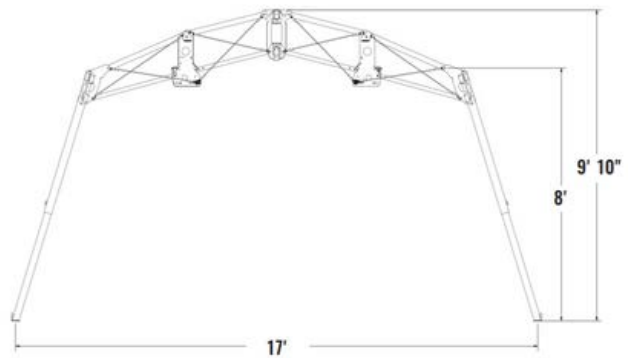

Superior replacement for the Base-X 305

10 Minute Setup!

- Under canopy with only 4 people in under 10 minutes
- Fully integrated floor and liner comes standard with each RDS-480
- Comes standard with TEMPER vestibule adapter
- No special kits for snow, wind or rain load
- Perfect for auxiliary tents in larger TOCs or as a standalone, highly-expeditionary remote operations center
- Easily boots to all fielded tents models and most vehicles

## Superior accessories

**Indestructible!**

Roll up your tent with the lights still inside!

### Climate Control

Eureka! has an energy efficient thermal liner solution for each large shelter. It takes advantage of radiant barriers and proprietary materials to keep the shelter safe from environmental extremes. Our RDS and MGPTS tents have seen a 30° delta while equipped with the Eureka! Rteq® thermal liners.

### Lighting

Partnering with the leading suppliers of military and disaster relief, we can supply lighting solutions for each style and size tent, and specific for its use i.e. dining, sleeping, hospital, school. Ranging from standard incandescent fixtures to ultra-efficient LEDs, each lighting solution will meet your immediate needs.

### Flooring

Whether the needs are standard vinyl flooring for shelters or hard, rapidly deployable and easily transportable floor systems, we have the solutions to supply the right floor for the right shelter, whether it be operating room or living room.

### Environmental Control

In addition to Eureka!'s Rteq Thermal Liner, we can supply the portable HVAC units and power units to get camps up and running within just days.

### Camp Services

Dining Halls, Kitchen Tents, Latrines, Cots, Table, Chairs to name a few...

**UNIQUE SUPPORT FOR UNIQUE MISSIONS**

# **CUSTOM SOLUTIONS**

**ANY PART. ANY ITEM. ON TIME.**

**MILITARY ACQUISITION SPECIALISTS**

RALLY POINT TACTICAL GETS YOU THE EQUIPMENT YOU  
NEED EXPEDIENTLY AND EFFICIENTLY WHILE PROVIDING  
THE BEST CUSTOMER SERVICE
